

Customer No.: 31561
Application No.: 10/709,307
Docket NO.: 12053-US-PA

REMARKS

The drawings are objected because in page 5, line 14 of the specification is said that "a fourth N+ diffusion area, partially formed in the third N-well region" and "a fifth N+ diffusion, partially formed in the third N-well region", which does not match the figures 2A and 2B in the application. Claim 1 is objected to because of some informalities and "a fifth N+ diffusion, partially formed in the *third* N-well region" should be amended to "a fifth N+ diffusion, partially formed in the second N-well region". All pending claims are allowable.

Applicants note with appreciation that all pending claims are allowable in the Office Action. Applicants have amended the specification in paragraph [0010] to match the figure 2A and 2B. Applicants have also amended claim 1 to overcome the objection. After entry of the foregoing amendments, claims 1-6 remain pending in the present application, and reconsideration of those claims is respectfully requested.
